ABSTRACTED-PUB-NO: JP2002236644A

BASIC-ABSTRACT:

NOVELTY - A server (1) has a database that stores registered voice information received from an information provider through information-provider telephone (3). The voice information is automatically inserted into a portal site. A browser can access the voice information in the website by picking the voice information from the database.

USE - For hosting websites for shops, firms etc., Using voice information received from information provider of shops or firms through telephone.

ADVANTAGE - The renewal of the data in the website is performed in real-time, and timely information are updated automatically in the website. Since the information provider inputs voice information through telephone, that is automatically inserted into the website, management of the associated website can be performed easily without requiring knowledge and experience with respect to personal computers.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of the portal site support system. (Drawing includes non-English language text).

Server 1

Information-provider telephone 3
